SOL DOLLECK, Assistant Chief for Systems Development
Data Processing Systems Division--ROBERT F. DRURY, Chief

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U.S. Bureau of the Census, United States Import Statistics, Report FT 120, January 1964. Washington 25, D. C. March 1964.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington, D.C. 20402 and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as nongovernment shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouses for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouses.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouses, bonded manufacturing warehouses, and bonded smelting and refining warehouses immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. Effective with statistics for January 1962, information is being compiled on United States general imports of merchandise by air. These data are published in Reports FT 380, FT 390 and FT 986. A more complete description of the coverage and presentation of the various types of statistics mentioned above will be found in the introductions to the specified reports.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is

---

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements.

Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COUNTRY OF ORIGIN

(a) Country Definitions - Economic. The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the transactions are credited to the country of shipment. (For individual Schedule A commodities, such countries are footnoted in Report No. FT 110, United States Imports of Merchandise for Consumption, Commodity by Country of Origin.) At the end of this report, following the statistics for individual countries, the country designation "Unidentified Countries" (arbitrary country code 998 in import tabulations) is shown. This designation is used to reflect imports from countries which could not be identified because of illegible reporting on import entries for low-valued shipments and certain imports of thorium and thorium-bearing materials from countries which, for security reasons, can not be identified by name. The totals shown under "Unidentified Countries" are excluded from the other country and country by SITC group totals in this report.

(b) Country Definitions - Geographic. The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as Annex B in TSUSA (see "SITC Commodity Group Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents of this report, which lists the countries in Schedule C order, will assist in locating the data for individual countries. The omission of a country name from this report indicates that there were no formal entry shipments valued $100 or over included in the statistics for the country and no low-valued shipments from the country were selected in the one-percent sample. See "Low-valued shipments in country totals on estimated basis" below.

(c) Low-valued shipments in country totals on estimated basis. The country totals in this report include data on an estimated basis for imports valued under $100 reported on formal entries and imports reported on informal entries (by definition, valued not more than $250). (See discussion below under "SITC Commodity Group Information.") For any country where the low-value estimate may make up a significant portion of the country total, the sampling variability of the estimate may need to be considered in connection with the reliability of the country total. The estimates are shown in this report under the arbitrary SITC group code 990 "LOW VALUE DOLLAR EST" for each country. The extent to which the estimates might not agree with a complete tabulation of the shipments depends on the number of documents which fall in the sample. This is the number at the left of the value figure for the group 990 estimate in this report. It is followed by two asterisks for ready identification. This number can be used in conjunction with the following table to obtain an estimate of the sampling variability on a two times out of three basis.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicoted from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1]The actual value of shipments cannot be less than 1/100 of the estimated amount shown in the report. Figures in this column can be ignored if use of them for a particular total would bring the lower limit below 1/100 of the estimate.

[2]If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

The following will illustrate the use of the table.

Suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line 40-49, one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,559,689 for the fully compiled data plus an estimate of $397,500 for group 990 based upon 75 shipments in the sample would be between $15,855,189 ($15,957,189 reduced by $102,000) and $16,077,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

In order that users may always be informed of the amount of the LOW VALUE DOLLAR EST for each country, this group is always shown separately and is not subject to the combining procedure which applies to other groups when values are less than $10,000. (See "SITC Commodity Group Information," below.) The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country, and no estimate of low-valued shipments is included in the country total. This does not necessarily mean that low valued imports were not made.

SITC COMMODITY GROUP INFORMATION

(a) Commodity information summarized into SITC groups. The commodity information in this report is presented in terms of the three-digit group codes of the Standard International Trade Classification, Revised. Effective with the statistics for September 1963, this commodity information represents the summarization of data originally compiled in accordance with the classifications in Tariff Schedules of the United States Annotated (TSUSA), an official publication of the United States Tariff Commission, embracing the legal text of the Tariff Schedules of the United States together with statistical annotations. TSUSA replaces Schedule A, Statistical Classification of Commodities Imported into the United States, under which import statistics were previously compiled.

The assignment of SITC group codes to the Tariff classifications was originally made by the Tariff Commission. Correlation lists which show the SITC group code assigned to each TSUSA number and the TSUSA numbers included in each SITC group are included in the September 1963 issue of this report. Copies of these correlations may

also be obtained from the Bureau of the Census. Possible differences in the coverage of individual SITC group codes resulting from the change from Schedule A to TSUSA classifications should be taken into consideration whenever SITC group information for September 1963 and subsequent months is compared with similar data for periods prior to September 1963.

Some of the SITC group descriptions in this report are necessarily abbreviated to save printing costs. For further definition of the SITC groups, reference should be made to the Standard International Trade Classification, Revised (United Nations, New York, 1961—Series M, No. 34). For definition of individual TSUSA classifications included in the SITC groups, reference should be made to Tariff Schedules of the United States Annotated (1963), Tariff Commission Publication 103, available at the office of the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, at offices of local Collectors of Customs, and Department of Commerce Field Offices.

(b) SITC groups less than $10,000 not shown separately. To save printing costs, complete country by SITC group information is not shown in this report. For each country, separate information is shown only for those SITC groups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in groups with individual totals of less than $10,000 for that country are presented as a combined total for each SITC section. Individual SITC group information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of an SITC group under any country indicates no imports from that country or imports valued less than $10,000, with the exception of those SITC groups for which statistics are not compiled or shown separately. (See "Commodity information summarized into SITC groups" above and the SITC/TSUSA correlation lists.)

(c) Low-value shipments excluded from SITC commodity group data. Effective January 1958 through December 1962, the commodity subgroups which were shown in this report (with the exception of subgroup 990, "LOW VALUE DOLLAR EST") excluded information on imports valued under $100 reported on formal immediate consumption entries and imports reported on informal entries (by definition, valued not more than $250). Effective January 1963, the individual SITC commodity groups (except group 990) also exclude data on the above-mentioned types of shipments and, in addition, they exclude data on warehouse withdrawals for consumption valued under $100. In compiling the statistics for September 1963 and subsequent periods, these procedures for the exclusion of low-valued imports from the individual commodity classifications will continue to be in effect. It follows that the import statistics for the individual SITC groups (other than group 990) are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded from the individual groups amounts to about one percent of the monthly import total. The estimates are shown for each country under group code 990, "LOW VALUE DOLLAR EST," and are included in the Section 9 total, the country total and the over-all import total in this report. Although subject to considerable sampling variability (see further explanation under "Country of Origin," above), these estimates may be of interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the SITC group data for individual countries.

Descriptions of the special handling of low-valued shipments in effect prior to January 1958 are included in the publications for those periods. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

(d) Data on SITC basis for periods prior to 1963. With the change in presentation of commodity information in terms of SITC classifications effective January 1963, users of the statistics may wish to have information for periods prior to 1963 arranged in terms of the SITC, in order to make comparisons between the 1963 statistics and those for earlier periods. For 1962, publications have been prepared containing monthly and annual value totals in SITC section by SITC group by country of origin arrangement and in country by SITC section by SITC group arrangement. The monthly and annual data are presented in separate publications. These publications also contain correlation lists in Schedule A commodity number by SITC group arrangement and in SITC group by Schedule A commodity number arrangement. In addition, monthly and annual data in SITC group by Schedule A commodity number by country arrangement are contained in machine tabulations which are available for use at principal reference locations. The 1962 monthly data in the publication and in the machine tabulation do not include any revisions made subsequent

to the release of the original monthly statistics but revisions to these statistics are presented as a supplement in the publication. The 1962 annual data in the publication and in the machine tabulation reflect all revisions published with the 1962 monthly statistics. Additional information regarding these 1962 statistics in SITC arrangement and information concerning the availability of data for prior periods in terms of the SITC classifications may be obtained from the Bureau of the Census.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) A Catalog of United States Foreign Trade Statistical Publications is also available. Supplementary information and explanations of interest to users of foreign trade statistics (such as announcements of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) which were formerly included in a separate publication, Foreign Trade Statistics Notes, are now being included as special announcements in current issues of this report and other statistical publications. Copies of such announcements are also attached to reference copies of tabulations, where appropriate. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost of a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

**Import data for arbitrary SITC group code 990 are estimates based on a 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in SITC section 9 total and in the country total. See the introduction of this report for an explanation of the sampling procedure and use of number of shipments in sample, shown immediately to the left of the double asterisk (**), to determine the reliability of the estimate.

**Import data for arbitrary SITC group code 990 are estimates based on a 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in SITC section 9 total and in the country total. See the introduction of this report for an explanation of the sampling procedure and use of number of shipments in sample, shown immediately to the left of the double asterisk (**), to determine the reliability of the estimate.

**Import data for arbitrary SITC group code 99D are estimates based on a 1% sample of informal entry shipments valued $1-$25D and formal entry shipments valued $1-$99. These estimated amounts are included in SITC section 9 total and in the country total. See the introduction of this report for an explanation of the sampling procedure and use of number of shipments in sample, shown immediately to the left of the double asterisk (**), to determine the reliability of the estimate.

**Import data for arbitrary SITC group code 990 are estimates based on a 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in SITC section 9 total and in the country total. See the introduction of this report for an explanation of the sampling procedure and use of number of shipments in sample, shown immediately to the left of the double asterisk (**), to determine the reliability of the estimate.

**Import data for arbitrary SITC group code 990 are estimates based on a 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in SITC section 9 total and in the country total. See the introduction of this report for an explanation of the sampling procedure and use of number of shipments in sample, shown immediately to the left of the double asterisk (**), to determine the reliability of the estimate.

**Import data for arbitrary SITC group code 990 are estimates based on a 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in SITC section 9 total and in the country total. See the introduction of this report for an explanation of the sampling procedure and use of number of shipments in sample, shown immediately to the left of the double asterisk (**), to determine the reliability of the estimate.

**Import data for arbitrary SITC group code 990 are estimates based on a 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in SITC section 9 total and in the country total. See the introduction of this report for an explanation of the sampling procedure and use of number of shipments in sample, shown immediately to the left of the double asterisk (**), to determine the reliability of the estimate.

**Import data for arbitrary SITC group code 990 are estimates based on a 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in SITC section 9 total and in the country total. See the introduction of this report for an explanation of the sampling procedure and use of number of shipments in sample, shown immediately to the left of the double asterisk (**), to determine the reliability of the estimate.

**Import data for arbitrary SITC group code 990 are estimates based on a 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in SITC section 9 total and in the country total. See the introduction of this report for an explanation of the sampling procedure and use of number of shipments in sample, shown immediately to the left of the double asterisk (**), to determine the reliability of the estimate.

**Import data for arbitrary SITC group code 990 are estimates based on a 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in SITC section 9 total and in the country total. See the introduction of this report for an explanation of the sampling procedure and use of number of shipments in sample, shown immediately to the left of the double asterisk (**), to determine the reliability of the estimate.

**Import data for arbitrary SITC group code 990 are estimates based on a 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in SITC section 9 total and in the country total. See the introduction of this report for an explanation of the sampling procedure and use of number of shipments in sample, shown immediately to the left of the double asterisk (**), to determine the reliability of the estimate.
